#### Fishing Methods Used in Associated Fisheries

- Midwater trawl
- Bottom trawl
- Dredge
- Seine nets
- Purse seine
- Lift nets
- Gillnets and entangling nets
- Long line
- Handlines and pole-lines
- Pots and traps

**Summary**
Our customers desire to know that the seafood they purchase from Meijer comes from high-quality, sustainable sources. This requires us to keep an unwavering focus on governance, supplier partnerships, and support for continuous improvement efforts to provide the best quality seafood. Meijer works with the Global Aquaculture Alliance (GAA) to help its farmed seafood suppliers achieve the GAA’s strict Best Aquaculture Practices (BAP) certification. The Company encourages all of its wild-caught seafood suppliers to become certified by the Marine Stewardship Council (MSC) or the Global Sustainable Seafood Initiative, and also sources from international fisheries involved with Fishery Improvement Projects (FIP).

**Environmental Notes**

- This fishery is unlikely to have direct impacts on PET species.
- Bycatch for this fishery is considered low and there are mitigation measures in place.
- This fishery is unlikely to have a significant impact on the sea bed.

**General Notes**

- This fish plays an important role in the marine food web and so potential impacts on the wider marine ecosystem must be monitored.
