Sam’s Club

Sam’s Club is a leading membership warehouse club offering superior products, savings and services to millions of members in nearly 600 clubs in the U.S. and Puerto Rico. Now in its 37th year, Sam’s Club continues to redefine warehouse shopping with its highly curated assortment of high-quality fresh food and Member’s Mark items, in addition to market leading technologies and services like Scan & Go, Club Pickup and home delivery service in select markets. To learn more about Sam’s Club, visit the Sam’s Club Newsroom or shop at SamsClub.com.

The profile below is based upon reports by participating Sam’s Club suppliers in the continental US for fresh and frozen seafood in 2019, and has not been verified by third-party traceability systems.

### Fishing Methods Used in Associated Fisheries

- Midwater trawl
- Bottom trawl
- Dredge
- Purse seine
- Lift nets
- Gillnets and entangling nets
- Hook and line
- Longlines
- Handlines and pole-lines
- Rake / hand gathered / hand netted
- Pots and traps

### Summary

At Sam’s Club, we know that seafood is an important source of nutrition and income for people all over the world. That’s why we work with partners all along the supply chain to deliver affordable products in a way that is sustainable for both people and planet. It is our commitment to create a transparent supply chain for our members, as well as to uphold high standards for sustainability so we can do our part to help protect and preserve ocean ecosystems for future generations.

We require all of our seafood suppliers to provide detailed information on where and how each item is sourced (place of origin, catch method, scientific name and more). Their data is then reviewed by the Sustainable Fisheries Partnership (SFP). Sam’s Club will only source seafood that meets our minimum sustainability requirements: certified by a third party approved by the Global Sustainable Seafood Initiative (GSSI) or in a Fishery Improvement Project, whose progress is being closely measured, reported and supported.

**Environmental Notes**
- This fishery is unlikely to have direct impacts on PET species.
- Bycatch for this fishery is considered low and there are mitigation measures in place.
- This fishery is unlikely to have a significant impact on the sea bed.

**General Notes**
This fish plays an important role in the marine food web and so potential impacts on the wider marine ecosystem must be monitored.

### American sea scallop

**Placopecten magellanicus**

**Eastern Georges Bank**

**Fishery countries:**
- Canada

#### Environmental Notes
- This fishery is unlikely to have significant impacts on PET species.
- Bycatch for this fishery is likely to be low. Furthermore, bycatch of commercial finfish is included in groundfish quotas.
- Dredges will directly impact on the sea bed.

#### General Notes

**Reference**

Seaboard Watch, 2011, Canada Atlantic Sea Scallop Seafood Watch Report

### American sea scallop

**Placopecten magellanicus**

**US Atlantic – Mid-Atlantic Bight**

**Fishery countries:**
- U.S.

#### Environmental Notes
- There are risks to sea turtles with this fishery, but there are mitigation measures in place.
- Bycatch is a risk in this fishery.
- Dredges will directly impact on the sea bed.

#### General Notes
- No additional notes.

### Argentine red shrimp

**Pleoticus muelleri**

**Patagonian – Argentina inshore, Argentina offshore**

**Fishery countries:**
- Argentina

#### Environmental Notes
- No additional notes.
Environmental Notes

- There are risks to sharks and rays with this fishery.
- Bycatch of hake is a risk with this fishery.
- Bottom trawls will directly impact on the sea bed.

General Notes

References

Fishery Progress, Argentina onshore red shrimp - bottom trawl FIP
Fishery Progress, Argentina offshore red shrimp - bottom trawl FIP

Atlantic cod
Gadus morhua
Barents Sea
Fishery countries:
Russia

Environmental Notes

- There are risks to protected, endangered and threatened (PET) species with this fishery, but a strategy is in place to manage and minimize impacts.
- Bycatch is a risk for this fishery, but there are management measures in place.
- Bottom trawls will directly impact on the sea bed.

General Notes

- No additional notes.

Atlantic cod
Gadus morhua
Icelandic
Fishery countries:
Iceland

Environmental Notes

- This fishery is unlikely to have direct impacts on PET species.
- There is bycatch for this fishery but non-target species are retained. Management measures are in place to reduce impacts on retained species.
- Bottom trawls will directly impact on the sea bed.

General Notes

- No additional notes.
Atlantic cod
*Gadus morhua*

North Sea, E English Channel and Skagerrak

Fishery countries:
- Norway

**Environmental Notes**
- This fishery is unlikely to have a significant impact on PET species but occasional interactions with elasmobranchs (skates, rays and sharks), grey seals, and allis shad may occur.
- The main bycatch species include haddock, whiting and saithe, among others.
- No information was found regarding impacts for this gear type.

**General Notes**
- No additional notes

Atlantic halibut
*Hippoglossus hippoglossus*

Scotian Shelf and Southern Grand Banks

Fishery countries:
- Canada

**Environmental Notes**
- Profile not yet complete.

**General Notes**
- The life history characteristics of Atlantic halibut: long-lived and late maturity, increase its vulnerability to overfishing.

Atlantic seabob
*Xiphopenaeus kroyeri*

Guyanese

Fishery countries:
- Guyana

**Environmental Notes**
- There is a risk to PET species with this fishery.
- Bycatch is a risk for this fishery, but there is insufficient data available to assess significance.
- Habitat impacts in this fishery are not well understood.

**General Notes**
- This fishery was in the [Guyana Atlantic seabob - otter trawl FIP](#) which entered MSC full assessment in September 2018 and achieved MSC certification in August 2019.
Atlantic seabob

*Xiphopenaeus kroyeri*

**Suriname**

**Fishery countries:**

Suriname

**Bottom trawl**

Certified

Well managed

---

**Environmental Notes**

- There are risks to rays with this fishery, but there is insufficient data available to assess significance.
- There is bycatch for this fishery but non-target species are retained. Management measures are in place to reduce impacts on retained species.
- Profile not yet complete.

**General Notes**

- No additional notes

---

Atlantic surf clam

*Spisula solidissima*

**U.S.**

**Fishery countries:**

U.S.

**Dredge**

Certified

Well managed

---

**Environmental Notes**

- This fishery is unlikely to impact PET species.
- Bycatch for this fishery is considered low.
- This fishery is unlikely to have a significant impact on the sea bed.

**General Notes**

- No additional notes

---

Bigeye tuna

*Thunnus obesus*

**Marshall Islands**

**Fishery countries:**

Marshall Islands

**Longlines**

FIP

Managed

---

**Environmental Notes**

- There are risks to seabirds, sea turtles and marine mammals with this fishery, but there are mitigation measures in place.
- Bycatch for this fishery includes other fish, tuna and sharks, but there are mitigation measures in place.
- This fishery is unlikely to have a significant impact on the sea bed.
